

Why Buffalo Abrasives?

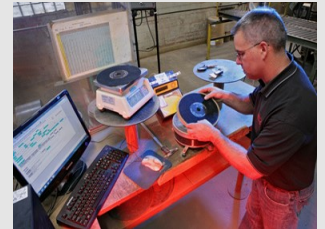

What impact would an efficient grinding wheel manufacturing partner have on your business?

Offer engineering, value added, top quality consistent & competitive product to help you gain business?

What if you could deliver engineered products in @ 1/2 the time of your competitors?

Introducing Buffalo Abrasives. A family run company with 30 years of experience, we design and manufacture a complete line of custom, high performance grinding wheels such as Roll Grinding, Precision Centerless, Cut-Off, Medical Equipment, Snagging Foundry, Flute & Thread Grinding Wheels to name a few. Our Application Engineers work with your team to provide non-catalog, highly engineered, custom grinding wheels to ensure optimized performance for your specific applications.

Review our History, "Profile" and "Corporate Focus" under the "Home" section of our website. We provide best-in-class custom engineered abrasives. See our "Product" and "Market" sections to determine what capabilities best fit your needs.

We pride ourselves on customer service and **our** U.S. manufacturing facility allows us to offer same day responses to customer inquiries, same day order entry, short manufacturing lead times (7-8 weeks) for Resin, Shellac, Epoxy & Rubber bonds. Vitrified (12-14 weeks) with stock support program— on-time delivery and expedited orders at no additional charge.

Buffalo Abrasives has **an** extensive technical range and competes globally in the market, Buffalo also remembers the reason we've had a successful business for 30 years, is our customers.

We offer No Risk Guaranteed Performance Trials to evaluate our recommendations against your current specifications in terms of rate of cut, finish, wheel life, productivity and potential cost savings.
